

MT Constant Speed Propeller Package

This new Composite propeller from MT offers impressive improvements over traditional wood propellers and the Hamilton Standard 2B20 constant speed.

- Lower Weight – Nearly 70 pounds less, only 11 pounds more than standard wood fixed pitch props.
- Better performance in all phases of flight
 - Much better high altitude performance
- Modern design – no oil or grease leaks
- Improved cooling, no requirement for “expanded cowling” or cooling modifications
- Much smoother in flight

Costs:

Composite Propeller MTV-15 with 20 Spline Hub	\$ 16,500
Composite Spinner	\$ 3100
Freight & Packaging from Germany	\$ 685
